Making homes energy efficient

What is ECO4?

The **ECO4 scheme** (Energy Company Obligation 4) is a government energy efficiency initiative in the UK. It is aimed at improving energy efficiency in homes, particularly for low-income households or those considered vulnerable. The scheme is funded by major energy suppliers, who are obligated to provide financial support for energy-saving improvements.

What Measures are Available?

A range of measures are being offered under the ECO4 **GRANT** scheme, including

Wall Insulation

Enjoy comfort year-round with wall insulation, including external and internal wall insulation.

Roof Insulation

Roof insulation keeps heat in during cold weather and out in warmer seasons.

Renewables

Save more by making the switch to renewables, including solar PV and air source heat pumps.

Heating Systems

Cut your bills further with heating systems, including boilers, storage heaters, and heating controls.

Properties that qualify can receive **grants** covering up to the total cost of improvements.

IZ Energy is an accredited installer who can assist you with every step of your ECO4 journey.

*Whilst we aim to offer all upgrades free of cost, there may be instances where the funding does not cover the full cost of the upgrades, and a customer contribution may be required.
